SOFTWARE ENGINEER

Romain Rodrigues

I design and build web applications, from first idea to production.

github.com/RomainRodrigues

PROFILE

A web developer at heart, I love working across the whole stack: front end, back end, infrastructure and project management. What drives me is turning an idea into a real product that is clean and a pleasure to use.

JOURNEY

2021 — 2023 · IUT de Lannion, France

Bachelor in Computer Science (BUT)

Two years laying solid foundations: algorithms, databases and web development.

2022 — 2026 · Cooperl

Work-study program

Four years as an apprentice developer, working on real projects, in a team and in production.

2023 — 2026 · ENSSAT, Lannion, France

Engineering degree in Computer Science

A broad, Master's-level engineering degree in computer science, completed alongside the work-study program, with a specialization in artificial intelligence in the final year.

Since Sept. 2026 · Cooperl — Full-time

Software engineer & junior project manager

I design and build applications, and lead projects from start to finish.

PROJECTS

ChatLive · Instant messaging · 2026

A real-time chat app inspired by Discord and Slack, with servers, channels, authentication and dark mode.

Nuxt 4 · Nuxt UI · Drizzle · PostgreSQL — github.com/RomainRodrigues/ChatLive

Claude Tips · Documentation · 2026

A beginner-friendly French guide to Claude Code, written with Claude Code itself using several agents in parallel.

Nuxt Content · Nuxt UI · Cloudflare — claude.romrd.fr

PHP CS Fixer Docker · VS Code extension · 2026

Formats PHP with PHP CS Fixer right inside your Docker containers, with a single global configuration.

TypeScript · VS Code API · Docker — github.com/RomainRodrigues/php-cs-fixer-docker-ext

Scanner · Rust library · in progress · 2026

A QR code and barcode scanning engine written in Rust, built for real-time camera streams and usable from Node.js or the browser via WebAssembly.

Rust · WebAssembly · napi-rs

SKILLS

Web

Vue · Nuxt · TypeScript · JavaScript · Tailwind · Nuxt UI · GSAP · React

Back end & tooling

Node.js · Express · PHP · PostgreSQL · Drizzle · Docker · Git · CI/CD

Foundations

Python · C · Rust · Artificial intelligence · Algorithms · Project management

HOW I WORK

Design.

Understand the need, shape the architecture, craft the experience.

Build.

Typed, tested and maintainable code, with Vue and Nuxt at its core.

Lead.

Scope, coordinate and ship. From the first ticket to production.
